Methods of Evaluation

Students will be expected to access Canvas several times a week. This course will have a chapter quiz (assessment) at the end of each chapter and there will be a midterm and final exams. Several discussion topics will be given and participation is required. After completing the final exam, students will also be required to take one of the practice tests on the CD which mimic the A+ examine and submit a screen copy of the results. The discussion topics will mainly be graded pass/fail – if you participate it counts, but you will only have a limited time to participate. The CD in the book contains two MasterExam practice exams, MasterSim interactive labs, CertCam Video clips, the Glossary and a link to download the adobe Digital Edition eBook. Students must use Canvas for assignment submission.

Methods of Instruction

This is a distance learning course and if you need help, have questions or find errors please feel free to send a message via Canvas Conversations and I will try to respond by the end of the next day.

During discussions it will not be appropriate or tolerated for saying anything derogatory against any other students in the discussion. We were all new to this a sometime.

The student in this class should have a computer capable of internet access and have a connection capable of downloading or streaming videos. If this is not possible the student would be required to come to the campus or another internet accessible computer. The campus has computer labs and library which will have computers capable of this type internet access. There will be sufficient time to submit all work. If you wait until the night before the material is due then I will not accept that as an excuse. There will be no need to be on campus for this course unless you need access to a computer, except for the Midterm and the Final

Anyone caught cheating to take tests will result in failure for the course.

Course & Instructor Policies

All work will completed by the dates set in Canvas, no exceptions.

Class Attendance

Academic success is closely associated with regular classroom attendance and course participation. All successful students, whether on campus or online, are expected to be highly self-motivated. All students are required to participate in courses regularly and are obliged to participate in class activities and complete and submit assignments following their professors' instructions. Students taking courses during compressed semester time frames such as mini-mester, summer sessions, and mid-semester should plan to spend significantly more time per week on the course. Responsibility for work missed because of illness or school business is placed upon the student. More than two (2) absences are considered to be excessive. In addition, students' eligibility to receive financial aid or live in a College dormitory can be affected by withdrawal from courses. When withdrawal occurs, any tuition refund would be made in accordance with state regulations.

For Internet classes a student must have changed something or interacted with the instructor not just logging into Canvas.

Last day attended for this course will be the date of last Assessment completed.

Student Conduct & Discipline

Since this is an internet course, be kind to others when using chat, discussions and mail.

Academic Integrity

The faculty expects from its students a high level of responsibility and academic honesty. Because the value of an academic degree depends upon the absolute integrity of the work done by the student for that degree, it is imperative that a student demonstrate a high standard of individual honor in his or her scholastic work.

Scholastic dishonesty includes but is not limited to cheating, plagiarism, collusion, and the submission for credit of any work or materials that are attributable in whole or in part to another person, taking an examination for another person, any act designed to give unfair advantage to a student or the attempt to commit such acts. Plagiarism, especially from the web, from portions of papers for other classes, and from any other source is unacceptable.

Student Responsibility

You have already made the decision to go to college; now the follow-up decisions on whether to commit to doing the work could very well determine whether you end up working at a good paying job in a field you enjoy or working at minimum wage for the rest of your life. Education involves a partnership that requires both students and instructors to do their parts. By entering into this partnership, you have a responsibility to show up for class, do the assignments and reading, be engaged and pay attention in class, follow directions, and put your best effort into it. You will get out of your experience here exactly what you put into it – nothing more and nothing less.

Title IX

GC policy prohibits discrimination on the basis of age, ancestry, color, disability, gender identity, genetic information, national origin, race, religion, retaliation, serious medical condition, sex, sexual orientation, spousal affiliation and protected veterans status.
