GRAYSON COLLEGE ASSOCIATE DEGREE NURSING PROGRAM

Nursing 2 RNSG 1461 Clinical Packet Spring 2017 GRAYSON COLLEGE

Course Syllabus

Course Information

RNSG 1461, Clinical Nursing II, Spring 2017

Course Pre-requisites, Co-requisites, and/or Other Restrictions

BIOL 2301, 2101, 2302, and 2102, RNSG 1523, 1119, 1460. A grade of Pass is required in RNSG 1461 to progress to Nursing III. This course must be taken and passed concurrently with RNSG 2404 and RNSG 1144.

Course Placement: Second semester of the nursing program.

Course Description

A health-related work-based learning experience that enables the student to apply specialized occupational theory, skills, and concepts. Direct supervision is provided by the clinical professional. RNSG 1461 must be taken concurrently with RNSG 2404 and RNSG 1144.

Student Learning Outcomes: Concurrent Completion of RNSG 1144 and RNSG 2404

As outlined in the learning plan, apply the theory, concepts, and skills involving specialized materials, tools, equipment, procedures, regulations, laws, and interactions within and among political, economic, environmental, social, and legal systems associated with the occupation and the business/industry and will demonstrate legal and ethical behavior, safety practices, interpersonal and teamwork skills, and appropriate written and verbal communication skills using the terminology of the occupation and the business/industry.

Student Learning Outcomes

Member of the Profession:

- 1. Demonstrate professional attitudes and behaviors.
- 2. Demonstrate personal accountability and growth.
- 3. Advocate on behalf of patients, families, self, and the profession using established guidelines.

Provider of Patient-Centered Care:

- 1. Use clinical decision making skills to provide safe, effective care for two or more patients and families.
- 2. Develop, implement and evaluate teaching plans to meet the needs of patients and families.
- 3. Integrate a caring approach in the provision of care for diverse patients and families.
- 4. Perform skills safely and correctly in the provision of patient care.
- 5. Manage resources in the provision of safe, effective care for patients and families.

Patient Safety Advocate:

- 1. Implement measures to promote a safe environment for patients, self, and others.
- 2. Formulate goals and outcomes to reduce patient risk using evidence-based guidelines.

Member of the Healthcare Team:

- 1. Initiate and facilitate communication to meet the needs of patients and families.
- 2. Collaborate with patients, families, and healthcare team members to promote quality care.
- 3. Develop skills as the leader of a student team.

Scans Skills:

When taken concurrently with RNSG 2414, the following skills will be achieved: *Workplace Competencies*

1. Resources: Identifies. Organizes, Plans and Allocates Resources:

Students in RNSG 2462 have to be able to allocate their time and material/facility resources in an efficient manner in the clinical setting. They must be able to manage the care of a group of clients in the clinical setting. Students must organize and plan patient care activities so that the work is completed in the allocated time. Concepts of making client assignments for a team, that helps students learn how to distribute the patient care among members of the team, is introduced.

2. Interpersonal Skills: Works with Others

Students in RNSG 2462 must demonstrate skills of negotiation, delegation, and participation as a member of a team. Students learn to use concepts of management and evaluation skills as they work with other healthcare team disciplines. Students are also expected to meet self-directed learning goals that enable them to identify needs of growth.

3. Information: Acquires and Uses Information

Students in RNSG 2462 must continue with development -of information skills so that all resources of patient information are used to collect data. Sources of information include the individual hospital information systems, the college's extensive collection of resources including internet,

CAI, (available in the Health Science computer lab), patient record, physician record, nursing journals and other available references.

4. Systems: Understands Complex Inter-Relations

Students in RNSG 2462 must be able to practice within the legal scope of nursing practice. This legal scope includes the state of nursing regulations, federal legislation, state statutes and common law. The practice of nursing is governed by the Nurse Practice Act, which was enacted by the state legislature. A variety of laws are enacted at the state level that has a direct impact on the nurse providing clinical care.

5. Technology: Works with a Variety of Technology

Students in RNSG 2462 must be able to manage information and knowledge with use of advanced and emerging technology. Emerging technologies can be used to provide linkages, specifically information technologies used for information handling. The current focus is on using information collected by emerging technologies to gain a competitive advantage in healthcare.

Foundation Skills

1. Basic Skills: Reading, Writing, Math, Listening and Speaking

Students in RNSG 2462 are required to do several written assignments reflective of their clinical experiences such as nursing care plans and/or teaching plans. Participation in case study presentations is also required. Dosage calculations on math mastery exams requiring 90% competency is required.

2. <u>Thinking Skills: Creative Thinking, Problem Solving, Visualizing Relationships,</u> Reasoning and Learning

Students in RNSG 2462 are encouraged to be active participants in the learning process as well as self-directed learners. They must be able to identify their learning needs. Formulation of a philosophy of Nursing and personal values are exposed. By recognizing and identifying problems in the client populations, students develop and implement a plan of care.

3. <u>Personal Qualities: Responsibility, Self-esteem, Sociability, Self-Management, Integrity and Honesty</u>

Students in RNSG 2462 critique themselves after each clinical day with regard to professional development. They are expected to demonstrate the professional nursing role by expressing insight into their own learning needs. They must demonstrate respect for others, assume accountability for decisions and/or actions and involve self in finding solutions to problems.

Required Textbooks and Materials: See RNSG 2414 Syllabus

Required Assignments: Specific assignments, requirements, objectives, and clinical forms related to RNSG 2462 are included at the end of the course syllabus for ease of printing.

Academic Calendar: See RNSG 2414 syllabus

Methods of Instruction

- 1. Discussion
- 2. Group Process Role Play
- 3. Simulation of client situations
- 4. Study Guides
- 5. Audio-visual /Computer materials
- 6. Clinical practicum
- 7. Written assignments
- 8. Required textbooks
- 9. Instructor student conferences
- 10. Supervised care of selected clients
- 11. Daily evaluation

Clinical Evaluation

(Revised 11/2015)

- 1. A student must pass theory, lab and clinical courses to progress to the next nursing level.
- 2. The clinical grade is based upon clinical performance and written assignments.
 - A. Clinical performance will be evaluated by the clinical professor on a daily evaluation sheet, and on the *Clinical Performance Evaluation Tool* at mid-semester and upon completion of the semester.
 - B. Clinical performance is evaluated as a "Pass" or "Fail" grade. To receive a clinical grade of "Pass", the student must, at the completion of the clinical course, exhibit a satisfactory level of 75% or better on all starred (*) criteria (behaviors) on the *Clinical Performance Evaluation Tool*.
 - C. All assignments listed in the syllabus as well as any additional assignments given by the clinical professor must be satisfactorily completed and submitted to the clinical professor by the designated deadline date in order to receive a grade of "Pass." Assignments include returning the signed daily evaluation back to the instructor by the designated deadline.
 - D. Continued failure to turn in assignments by the designated deadline will result in an "Unsatisfactory" for each day / week that the assignment is late.

Course & Instructor Policies

Clinical Readiness Exam

(Reviewed 8/14)

In order to satisfy requirements of the program, clinical facilities and accrediting agencies, all nursing students must pass a clinical readiness exam before clinical begins in Nursing 1 & 3, or upon re-entry into a previously enrolled semester if it has been more than one semester since the student was in a clinical course. The student will have two attempts to pass the exam with a score of 75%. Students who do not pass with a score of 75% within two attempts will not be able to progress in the clinical component of the program. A *Clinical Readiness Exam* study guide is available to assist the student to prep for this exam.

Clinical Readiness Requirement

In order to satisfy requirements of the program, clinical facilities and accrediting agencies, each student is required to pass a clinical readiness exam prior to beginning their clinical experience.

The student will have two attempts to pass the exam with a score of 75 %, and must be passed at the beginning of the Freshman and Sophomore year. Students who do not pass will not be able to progress in the clinical component of the program.

Topics to be included in the clinical readiness exam may include:

- a) Patient identification
- b) Communication among caregivers
- c) Safety issues related to client medications
- d) Universal protocols to eliminate wrong-site, wrong-patient, wrong-procedure surgery
- e) Serviceable medical equipment
- f) Clinical alarm systems
- g) Health care-associated infections
- h) Medication reconciliation across the continuum of care
- i) Client falls
- j) Abuse and neglect
- k) Electrical safety
- 1) Fire safety
- m) Hazardous materials
- n) Sentinel events
- o) Infection control
- p) Tuberculosis: personal protective equipment
- q) Client rights
- r) Restraints
- s) Cultural competence
- t) Developmental (age specific) competence
- u) Rights and safety of healthcare personnel
- v) Latex allergy
- w) Needle stick injury
- x) Sexual harassment and workplace violence
- y) Organizational ethics and compliance
- z) Emergency preparedness: disaster and bioterrorism

Attendance Policy

(Revised 11/14)

Regular attendance is mandatory for accomplishment of the ADN program's goals and objectives. The ADN program adheres to the *Grayson College Student Handbook* attendance policy. Should absences occur which do not allow for full evaluation of student performance (quality and consistency) faculty will be unable to assign a passing grade.

The following policies are specific to the clinical course.

- Attendance on the assigned clinical day is mandatory. Any missed clinical time must be made up. More than one clinical absence during the entire program may be grounds for dismissal based on the recommendation of the Admission, Retention and Graduation Committee.
- 2. Students must attend all pre and post-conferences either in the clinical setting or on campus (i.e., guest speakers, lab practices, etc.).
- 3. Students are expected to remain on the clinical campus during the entire clinical day. If a student must leave the clinical campus during a designated meal or break time, the student must have permission of the clinical instructor and is responsible to ensure that there is adequate coverage to meet the needs of assigned clients.
- 4. Students must notify the professor or a designated alternate at least one hour prior to time scheduled for clinical if they are going to be absent. Failure to notify the professor will be reflected on the clinical evaluation and may result in a clinical failure.

Clinical Dress Code

(Revised 04/15)

The following are the requirements for student dress in the ADN program. While in uniform, the student **must** observe the dress code regulations at all times. Instructors will notify students of required modifications for specialty areas.

- 1. Students must purchase the required brand, style and color of the scrubs approved for the current class. (Refer to *Clinical Uniform and Supplies* policy received during program orientation.)
- 2. When in uniform, top and pants must be of one color. (Different colored pants and tops may not be mixed) The assigned clinical agency will determine which color uniform is acceptable and will be part of the clinical orientation.
- 3. A designated ADN program approved white long sleeve or short sleeve shirt may be worn <u>under</u> the uniform for warmth or modesty.
- 4. Shoes must be conservatively and professionally styled with closed toes. Other than a medical device, boots of any type are not to be worn during the clinical day. Solid white or black socks or hose must be worn with the uniform. Socks must be a minimum of ankle length or longer.
- 5. The ADN program patch must be sewn on the left sleeve of each uniform and lab coat. These must be sewn on. Staples, safety pins or Velcro are not acceptable. The patch should be centered and located one inch below the shoulder seam.
- 6. A current Grayson College ADN program photo ID badge must be worn on the uniform at all times. Students will not be allowed to remain in clinical without the appropriate Grayson College-ID badge. (Available in the Student Life Center)

- 7. Any style lab coat or jacket may be worn over the uniform. However, it must be all white with an ADN program patch sewn on left sleeve.
- 8. Students are to maintain the following general appearance and decorum when in uniform.
 - a. Neat, clean and well-groomed appearance.
 - b. Shoes and uniforms must be clean and neat at all times.
 - c. Uniform must be appropriate length and fit.
 - d. Hair must be kept off shoulders. Collar length is acceptable if secured so as to not fall forward from the face.
- 9. Jewelry limited to:
 - Medical ID bracelet if needed. No other necklaces or bracelets.
 - One set of stud earrings (approximately 4mm in diameter, no colors). Only one stud allowed and only in each lower ear lobe.
 - Earlobe expanders must be removed and replaced by a flesh-colored earlobe plug.
 - Plain wedding ring only.
 - No visible body piercing other than normally placed for stud earrings (in lower ear lobe).
- 10. No nail polish, artificial nails or tips; length of nails must not be visible over fingertips.
- 11. All tattoos must be covered.
- 12. Hair, breath and clothing must be free of perfume, smoke or other odors in the clinical area.
- 13. White laboratory coats with ADN program patch and Grayson College picture ID **must** be worn over street clothes (no jeans, shorts, open toe shoes, or unprofessionally short skirts allowed) when performing other assigned activities that do not require wearing the school uniform.
- 14. Nursing student uniforms may be worn outside the clinical area **only** during classes, laboratory sessions, or events directly related to educational experiences offered by the ADN department. Student uniform or lab coat with the college patch, and the college name badge may not be worn on any job not associated with the Grayson College nursing program. Students working outside the program may not sign S.N. (Student Nurse) to any documentation.
- 15. In addition to the uniform requirements listed above, students participating in a clinical course are required to have the following items with them:
 - Watch with second hand
 - Ball point pen with black ink
 - Black Sharpie pen
 - Bandage scissors
 - Hemostats
 - Stethoscope
 - BP cuff
 - Pen light
 - Safety goggles (optional)
 - Pocket organizer (optional)
 - Additional items specified by clinical instructor

Students are recognized by the public as representatives of Grayson College. A student's appearance reflects not only on themselves, but on the college. Therefore, students can expect to be reminded of the dress code regulations by any faculty member who observes them improperly

dressed. In addition, instructors may choose to remove students from an area in which they are not appropriately dressed and/or assign a "U" (Unsatisfactory) for the clinical day.

Clinical Procedures Policy

(Revised 5/15)

- 1. Medications may be administered <u>only</u> after satisfactory completion of a campus laboratory student demonstration (check-off).
- 2. Procedures not marked may be performed independently by the student following satisfactory lab check-off.
- 3. All procedures marked with a (*) must be supervised by a faculty member until released for supervision by a designated Registered Nurse.
- 4. All procedures marked with a (#) must be supervised by the faculty member until released for supervision by a designated Registered Nurse; or by an assigned student team leader after approval by the instructor.
- 5. If an error is made while completing a procedure, the student must follow the *Procedure Variance Policy*.
- 6. Removal of any medical device must be approved or supervised by the clinical instructor or approved Registered Nurse.
- 7. During Role Transition, the clinical preceptor is the "designated RN."

Additional policies specific to the Nursing Program are published in the ADN Student Handbook.

Grayson College is not responsible for illness/injury that occurs during the normal course of classroom/lab/clinical experiences.

These descriptions and timelines are subject to change at the discretion of the Professor.

Grayson College campus-wide student policies may be found on our Current Student Page on our website: http://grayson.edu/current-students/index.html

Grayson College Associate Degree Nursing Clinical Nursing II RNSG 1461 Clinical Assignments/Activities

Daily student assignments will be organized around, either client care, experiences in specialty areas, or laboratory experiences.

When assigned to a specialty area, clinical objectives will be provided in an assigned study guide.

Clinical activities, to be performed as assigned:

- A. Medication and diagnostic information as required.
- B. Client care to include:
 - 1. Client assessment, including vital signs
 - 2. Personal care
 - 3. Safety measures
 - 4. Medical/surgical asepsis
 - 5. Procedures and medications assigned
 - 6. Report of observations and client care to charge nurse and instructor
 - 7. Participate in discharge planning
 - 8. Administration of intravenous therapy and medications.
- C. Documentation of client care according to hospital procedure.
- D. Written assignments to include:
 - 1. One Satisfactory Concept Map per semester.
 - 2. Two Narrative Chartings with a Priority Nursing Diagnosis form completed per semester.
 - 3. Priority Nursing Diagnosis & Interventions form for one client weekly, which includes your focused charting.
 - 4. Daily Clinical evaluation form completed.

- 5. Completion of Medication Summary Sheet prior to Medication Administration
- 6. Two comprehensive assessments per semester.
- E. Demonstrate satisfactory expected behaviors listed in RNSG 1461 Clinical Performance Evaluation Tool.

Grayson College Associate Degree Nursing Program 1461 Clinical Evaluation Performance Standards which Define Satisfactory Performance of Expected Behaviors

A summative clinical evaluation grade of Satisfactory is achieved by demonstrating expected behaviors 75% of the clinical time on all starred items. Behaviors that are graded are listed in the course clinical evaluation tool for each semester, under each clinical objective. The criteria that define behavioral standards at each level are listed below.

INDEPENDENT

- Performs <u>safely and accurately each time</u> behavior is observed <u>without</u> supportive <u>cues</u> from instructor.
- Demonstrates <u>dexterity</u>.
- Spends <u>minimal time on task</u>.
- Appears relaxed and confident during performance of task.
- Applies theoretical knowledge accurately each time.
- Focuses on client while giving care.

SUPERVISED

- Performs <u>safely and accurately each time</u> behavior observed.
- Requires supportive or directive <u>cue occasionally</u> during performance of task.
- Demonstrates coordination, but <u>uses some unnecessary energy</u> to complete behavior/activity.
- Spends reasonable time on task.
- Appears generally relaxed and confident; occasional anxiety may be noticeable.
- Applies theoretical knowledge accurately with occasional cues.
- Focuses on client initially; as complexity increases, focuses on task.

ASSISTED

- Performs <u>safely and accurately each time</u> observed.
- Requires frequent supportive and occasional directive cues.
- Takes <u>longer time</u> to complete task; occasionally late.
- Appears to waste energy due to poor planning.
- Identifies principles, but needs direction to identify application.
- Focuses primarily on task or own behavior, not on client.

PROVISIONAL

- Performs <u>safely under supervision</u>, not always accurate.
- Requires continuous supportive and directive cues.
- Demonstrates <u>lack of skill</u>; <u>uncoordinated</u> in majority of behavior.
- Performs task with considerable delay; activities are disrupted or omitted.
- Wastes energy due to incompetence.
- Identifies fragments of principles; applies principles inappropriately.
- Focuses entirely on task or own behavior.

DEPENDENT

- Performs in an unsafe manner; unable to demonstrate behavior.
- Requires continuous supportive and directive cues.
- Performs in an unskilled manner; lacks organization.
- Appears frozen unable to move, non-productive.
- Unable to identify principles or apply them.
- Attempts activity or behavior, yet is unable to complete.
- Focuses entirely on task or own behavior.

<u>Distinctive feature of the level of competence.</u>: Developed by Krichbaum, K. from Bondy, K (1983). Criterion-reference definitions for rating sclses in clinical evaluation. <u>Journal of Nursing Education 22</u>, 276-382.

Satisfactory: "Supervised" or above criteria

"Assisted" or above in new clinical learning experiences

Unsatisfactory: "Assisted" or lower cr

Grayson College Associate Degree Nursing Program Clinical Objectives

May include any of the objectives for previous clinical courses, as well as those listed for each course.

Analyze how your use of therapeutic communication skills impacted the outcome of patient care.
Collaboration & Coordination	Describe activities you used to encourage participation of the patient, family, and/or health care team to meet patient needs. Describe the role of a non-nurse member of the interdisciplinary healthcare team.	16.Describe how varying members of the IDT healthcare team impacted the outcome of care for your assigned patient.	Describe how your collaboration with other IDT members impacted the outcome of care for your assigned patients.	Analyze strategies you used to promote effective collaboration.

Grayson College Associate Degree Nursing Specialty Area Objectives

A clinical experience in a specialty area involves personal & professional responsibility in the following areas:

- 1. Preparation prior to the clinical experience as assigned
- 2. Communication & collaboration with the specialty area staff & your assigned preceptor

- 3. Completion of the specialty area objectives for the assigned experience
- 4. Completion of two clinical objectives
- 5. Timely submission of required paperwork related to your experience

Specialty Area Objectives: Emergency Department

- 1. Report to the ER supervisor or charge nurse following pre-conference. Assist an RN preceptor with client assessment, care and discharge. Invasive procedures may be performed with RN preceptor supervision. Observe the process of triage.
- 2. Written work: Submit a summary of your day. Compare nursing care you performed with standard triage procedures. Complete the two additional objectives you selected. Submit with daily evaluation.

Specialty Area Objectives: Day Surgery

- 1. Report to the DS supervisor or charge nurse at the time designated by the instructor. Assist with client assessment, care and discharge in the pre- and post-operative phases. Observe and assist with IV fluid preparation and IV insertion as available. Invasive procedures may be performed with RN preceptor supervision.
- 2. Written work: Submit a summary of your day. Identify nursing priorities observed in the pre and post-operative phases. List nursing care and skills performed. Complete the two additional objectives you selected. Submit with daily evaluation.

Critical Care (ICU) Clinical Objectives

- 1. Report to the ICU charge nurse following pre-conference. Assist with client assessment and care. Invasive procedures may be performed with RN preceptor supervision. Manually calculate IV flow rates on any continuous IV infusions, such as dopamine, lidocaine or heparin. Compare your results with the computer generated calculations. Perform a complete systems assessment for one client.
- 2. Written work: Submit a summary of day. Submit your math calculations, systems assessment, and a list of nursing care and skills. Complete two additional objectives that you selected. Submit these with your daily evaluation.

Cardiac Cath Lab Clinical Objectives

1. Report to the cath lab supervisor or charge nurse following pre-conference. Observe nursing priorities of care. Observe the procedure and assess for arrhythmias on the ECG. Identify medications used during the procedure.

2. Written work: Submit a summary of your day. List nursing priorities observed, ECG rhythms observed, and medications administered during the procedure. Complete the two additional objectives you selected. Submit with your daily evaluation.

GI Lab Clinical Objectives

- 1. Report to the GI Lab following pre-conference. Observe nursing priorities of care prior to, during, and post-procedure. Observe procedures, and identify medications used during the procedure. Invasive procedures may be performed with RN preceptor supervision.
- 2. Written work: Submit a summary of your day. List nursing priorities observed, medications used, and nursing care and skills you performed. Complete the two additional objectives you selected. Submit with your daily evaluation.

Operating Room Clinical Objectives (surgery)

- 1. Report to the OR at designated time. Observe the responsibilities and priorities of the circulating RN.
- 2. Written work: Submit a summary of your day. Describe the nursing care and priorities demonstrated by the circulating nurse and the operative procedures observed. Complete the two additional objectives you selected. Submit with your daily evaluation.

Hyperbarics/Wound Care Clinical Objectives

- 1. Report to the Hyperbarics Unit following pre-conference. Observe the nursing care and priorities of the hyperbarics & wound care nurses. Assist with wound care procedures. Invasive procedures may be performed with RN preceptor supervision.
- 2. Written work: Submit a summary of your day. Describe the nursing care and priorities demonstrated by the hyperbarics & wound care nurses. List procedures you performed. Complete the two additional objectives you selected. Submit with your daily evaluation.

Pediatrics Clinical Objectives

1. Observe the nursing care priorities and nursing care performed by the pediatric nurse. Assess and implement care for a pediatric client. Invasive procedures may be performed with RN preceptor supervision. Complete a full systems assessment on a pediatric client. In addition, include the following information:

Age, height, weight.

Locomotor skill level (sitting, crawling, walking, etc.)

Developmental stage, including evidence of successful accomplishment of previous stage (Erickson)

Interaction with family members

2. Written work: Submit a summary of your day. Describe nursing care and priorities of the pediatric nurse and the procedures you performed. Complete assessment data (#2). Complete the two additional objectives you selected. Submit with your daily evaluation.

Rehabilitation Unit Clinical Objectives

- 1. Observe the nursing care priorities and nursing care performed by the rehab nurse. Implement nursing care for a group of clients. Invasive procedures may be performed with RN preceptor supervision. Attend an interdisciplinary team meeting, if possible.
- 2. Written work: Submit a summary of your day. Describe the nursing care priorities in the rehab setting and the care and procedures you performed. Describe team collaboration observed. Complete the two additional objectives you selected. Submit with your daily evaluation.

Telemetry Unit Clinical Objectives

- 1. Observe telemetry recordings for normal electrical activity. Identify electrical and mechanical interference. Identify normal sinus rhythm, and compare with abnormal ECG recordings. Observe collaboration between the telemetry nurse and telemetry technician.
- 2. Written work: Submit a summary of your day. Describe the cardiac rhythms observed and the significance and treatment of each dysrhythmia. Complete the two additional objectives you selected. Submit with your daily evaluation.

Case Manager Clinical Objectives

- 1. Observe the role of the case manager. Identify priorities of case management, and communication and collaboration skills used to implement care.
- 2. Written work: Submit a summary of your day. Describe the role and priorities of the case manager, and the collaboration and communication skills observed. Complete the two additional objectives you selected. Submit with your daily evaluation.

House Supervisor Clinical Objectives

- 1. Observe the role of the house supervisor. Identify priorities of the house supervisor, and the impact this role has on the provision of client care.
- 2. Written work: Submit a summary of your day. Describe the role and priorities of the house supervisor, the impact on client care, and your activities during the experience. Complete the two additional objectives you selected. Submit with your daily evaluation.

Obstetrics Specialty Objectives

- 1. Report to the unit following preconference. Assist with client care. Perform a complete systems assessment for one client.
- 2. Written Work: Submit a summary of your day. Describe the nursing care and priorities demonstrated by the OB nurses. List procedures you performed. Complete the two additional objectives you selected. Submit with your daily evaluation.

Radiology Nursing Specialty Objectives

- 1. Report to the radiology nurse following preconference. Assist with nursing procedures and start IV's supervised by the radiology RN.
- 2. Written work: Submit a summary of your day. Describe the nursing care and priorities demonstrated by the radiology nurse. List procedures you performed. Complete the two additional objectives you selected. Submit with your daily evaluation.

Simulation Lab Specialty Objectives:

- 1. Completes all applicable components of the daily evaluation form.
- 2. Actively participates in role playing and simulation scenarios.
- 3. Contributes to the debriefing process using a positive approach.

ASSESSMENT GUIDELINES

PATIENT INITIALS MEDICAL DX

HEALTH HISTORY: Chief Complaint

Duration of problem & onset

Past medical history

BIO DATA/GENERAL

APPEARANCE:

Age, sex, ethnic origin

Marital status Height, weight

Apparent age

Voc./Financial status Living environment

TPR, B/P

PSYCHOSOCIAL: Coping patterns (habits, decision making, leisure

activities, identification of stressors)

Beliefs (health, spiritual, values) Developmental Stage (explain)

Thought processes, motivation, attention span

Mood/behavior/affect

Self-concept (body image, self-esteem, sexuality)

Role responsibilities Supportive relationships

Health perception/health maintenance

Meds

NEUROLOGICAL: Oriented to person, place and time

Level of consciousness

Speech patterns

Memory (recent & remote)

Facial symmetry

Vision

Pupillary Response

Hearing

Movement & strength of extremities

Coordination, balance, gait

Reflexes Sleep patterns Parasthesia Pain (headache) Dizziness or syncope

Seizures

Therapeutic procedures (TENS units, etc.)\
Diagnostic procedures (Cat scan, etc.)

Medications

CARDIOVASCULAR: Heart rate

Blood pressure

Peripheral Pulses (Strength, regularity, equality of pulses)

Apical - radial deficit Dysrhythmias Heart sounds

Extra heart sounds

Significant changes in blood pressure

Pain (with exertion)

Neck vein distention (at 45 degrees)

Shortness of breath

Edema - peripheral, sacral generalized - pitting, nonpitting

Weight gain

Skin (temp, capillary refill, color, diaphoresis)

Varicosities

Therapeutic procedures (pacemaker, telemetry, etc.)

Diagnostic procedures (Echo, ECG, etc.)

Medications

RESPIRATORY: Symmetry

Lung sounds

Pain (pleuritic, with inspiration or expiration)

Exertional dyspnea

Use of accessory muscles

Orthopnea

Abnormal breathing patterns

Cough (frequency, productive, non-productive)

Sputum (color & consistency)

Clubbing of fingers

Therapeutic procedures (oxygen, resp. therapy) Diagnostic procedures (blood gases, etc.)

Medications

GASTROINTESTINAL: Teeth/gums/mucosa

Appetite, anorexia, malnutrition, obesity, fluid intake

Diet and fluid intake Nausea, vomiting

Difficulty swallowing (dysphagia)

Pain or tenderness (indigestion, abdominal rigidity)

Contour (distention, masses, size)

Flatulence

Bowel sounds (presence or absence)

Stools (character, color)

Bowel patterns (frequency, incontinence, constipation, diarrhea,

last B.M.)

Rectal conditions (hemorrhoids, fistulas, bleeding)

Therapeutic procedures (laxatives, tubes, ostomies, I.V.s

hyperalimentation, etc.)

Diagnostic procedures (I & O, etc.)

Medications

RENAL/URINARY: Urine (color, character, odor)

Voiding pattern (urgency, hesitancy, dysuria, incontinence, etc.)

Pain

Therapeutic procedures (foley, ostomies, irrigations, etc.)

Diagnostic procedures (x-ray, MRI, etc.)

Medications

REPRODUCTIVE: Gravida____, Para___

Contraception

Breasts (size, shape, symmetry, pain, discharge)

Genitalia (appropriate for age, lesions, masses, discharge

abnormalities)
Menses/menopause

Pain

Therapeutic procedures Diagnostic procedures

Medications

MUSCULOSKELETAL: Risk assessment: Falls

Joint crepitus

Pain Posture Mobility & gait

Ability to perform A.D.L. Muscle strength/weakness

ROM

Peripheral edema
Deformity & amputations

Therapeutic procedures (PT, CPM, traction, etc.)

Diagnostic procedures (x-ray, MRI, etc.) Assistive devices (WC, TX, crutches, etc.)

Medications

ENDOCRINE: Heat/cold intolerance

Hair distribution Fat distribution

Weight (gain/loss, appropriate for height) Energy level (hyperactivity, fatigue)

Therapeutic procedures

Diagnostic procedures (lab values, etc.)

Medications

INTEGUMENTARY Skin temperature (warm, cool, etc.)

Turgor/texture

Risk assessment: pressure sores

Color

Skin integrity (incisions, scars, etc.)

Lesions (pressure sores, rashes, bruises, etc.)

Scalp/hair/nails

Pain

Therapeutic procedures (heat/cold tx., topical tx., etc.)

Diagnostic procedures (biopsies, etc.)

Medication

2	
3	
4	
EVALUATION: (Problem focused nurses' note)	
Revised 9/12	

GRAYSON COLLEGE ASSOCIATE DEGREE NURSING RNSG 1464/2404

Priority Nursing Diagnosis & Interventions (SAMPLE)

Nursing Dx: Acute Pain

R/T: frequent severe headaches secondary to hypertensive episodes

A.M.B. a. client reports pain of "10" on scale of 0 - 10

b. client exhibits clenched jaws, pinched features & tightly closed eyes

c. client appears agitated

Goal: Client will report pain < 3 by the end of the shift

Planned Interventions:

a. Acknowledge presence of pain

- b. Identify activities that increase pain
- c. Administer analgesics as ordered
- d. Teach distraction techniques
- e. Assess BP q 2 hours
- f. Review antihypertensive regimen with HCP

Evaluation: (Problem-focused nurse's note)

0730 BP 130/88. Alert, oriented, denies pain at present. Reports episode of severe headache during the night, relieved with pain medication.

0930. Returned from xray dept with c/o severe pain 10 on scale of 0-10. Agitated, voiced displeasure at not being given Catapres the evening prior for BP. Acknowledges that BP was not elevated the night before, and that the night nurse explained that the medication was ordered PRN for elevated BP. Encouraged client to discuss BP management with physician if a change in med regimen is desired. Client verbalized understanding and stated that taking BP med at night prevents a headache & high BP the next morning. BP at present 188/104.

0940 Morphine 2 mg given IVP for pain.

0950. Client reports decrease in headache. Rates at a 5. Instructed on relaxation techniques. Demonstrated understanding by performing deep breathing. Verbalized a willingness to use techniques when pain starts. BP 172/90. 1015 Client reports headache as "tolerable." Rates at a 3.

1030. HCP notified of client's request for PM dose of antihypertensive. New orders received, and client notified of new orders to begin this evening.

GRAYSON COLLEGE ASSOCIATE DEGREE NURSING CLINICAL PERFORMANCE EVALUATION TOOL Clinical II - RNSG 1461

STUDENT Term					Instructor	
	CI			CI	inical Facility	
I have read this evaluation tool and understand that my clinical performance will be evaluated according to these criteria.						
Date: Signat	Signature:					
 The student shares the responsibility for seeking opportunities for evaluation. Definition for criteria for clinical evaluation: S - (Satisfactory) Student demonstrates expected behaviors 75%-100% of clinical time. U - (Unsatisfactory) Student demonstrates expected behaviors 74% or less of clinical time. In order to pass clinical, the student must achieve <u>Satisfactory</u> on all items identified with an asterisk at the time of final evaluation. 						
RNSG 1461	Mid	l-term	Fi	nal	INSTRUCTOR	
EXPECTED STUDENT BEHAVIOR	S	U	S	U	COMMENTS	
I. PROVIDER OF CARE: Uses decision making skills	to pro	ovide s	afe, ef	fective	e care for two clients.	
Member of the Profession:						
1. Professionalism						
*a. Maintains confidentiality.						
*b. Seeks appropriate supervision and direction.						
*c. Adheres to agency policies.						
*d. Demonstrates positive, respectful demeanor and approach to others.						
2. Personal Accountability						
*a. Demonstrates accountability through insightful self- evaluation.						
*b. Adheres to ADN program policies.						
*c. Meets requirements for attendance.						
*d Meets requirements for written assignments.						
*e. Implements instructions from instructor and licensed personnel.						
*f. Assumes responsibility for achievement of learning outcomes.						
3. Advocacy						
*a. Identifies situations of concern to assigned patients and families.						
*b. Reports situations of concern in an effective manner.						
*c. Acts on behalf of patients and families in an effective manner.						
Provider of Patient Centered Care:						
Clinical decision making in the provision of care						
*a. Demonstrates sound clinical reasoning based on accurate, relevant knowledge.						
*b. Obtains report/gathers needed information before assuming care of patient.						

RNSG 1461	Mid-term		Final		INSTRUCTOR
EXPECTED STUDENT BEHAVIOR	S	U	S	U	COMMENTS
*c. Completes focused assessment within one hour of report.					
*d. Analyzes assessment data to plan and prioritize care.					
*e. Reports abnormal findings to instructor and staff.					
* f. Completes assigned care according to priorities.					
*g. Evaluates nursing care.					
* h. Uses outcomes of care to revise the plan of care.					
*i. Documents nursing care Accurate, legible, concise, timely.					
* j. Reports client's condition and summary of care at end of clinical day.					
k. Organize and manage time effectively.					
5. Patient Teaching					
*a. Provides appropriate explanations prior to implementing care.					
*b. Implements patient teaching.					
*c. Documents effectiveness of patient teaching.					
6. Caring approach to diverse patients and families					
*a. Provides considerate, non-judgmental, and respectful care.					
*b. Offers self in a therapeutic manner within professional boundaries.					
7. Effective use of resources					
a. Uses appropriate resources to ensure safe, effective care:					
*1 Human: faculty, staff, patient, HCP, families					
*2Information: medical record, report, current data, policies, references, worksheet					
*3 Material: supplies, equipment					
8. Skill Competency

Guidelines for Selection of Patients RNSG 1461

- 1. Check your schedule on the clinical rotation schedule to determine where you are assigned that week. Students assigned to operating room or specialty will not have assigned patients that week. The objectives for specialty areas are in your clinical packet.
- 2. Clinical Assignments will be made by the clinical faculty or selected by the student on morning of clinical with assistance of clinical faculty.
- 3. Student assignments will be posted on the unit by the clinical faculty.
- 4. Review the patient's information, MAR and chart the morning of clinical
- 5. When assigned medication administration, choose one and/or two of your clients to administer medications to (and write down their current medications to include time (from the MAR). IV medication administration is your main goal for this semester.
- 6. You will be doing Standardized Care Plans (one for each patient) on the client's primary diagnosis (reason for current admission).

*** You may NOT provide ANY nursing care (including client assessment) when your instructor is not in the hospital!!

^{***} Any necessary changes in student assignments will be arranged at the discretion of the instructor.

SBAR Report to a Health Care Provider

S

Situation

This is identify self and agency / location

I am calling about Patient name and location, Physician's name

The problem I am calling about is <u>briefly state the situation</u>, what it is, when it happened or started, and how severe the problem is.

Background

Give any pertinent background information/past medical history related to the situation. Might include:

Admitting diagnosis / date of admission

Current medications, allergies, IV fluids, restrictions

Special directives (code status, isolation, restraints, etc.)

Most recent vital signs

Lab results: significant / appropriate and compare to previous results

Current / previous treatments used & how pt. responded

Brief systems review: (specific to problem)

Cardiac status Respiratory status

Neurological / mental status

B

Assessment

This is what I think the situation is: say what you think the problem is.

If unsure of the problem: I do not know what is going on; but the patient is deteriorating.

The patient is unstable and seems to be worsening.

I thought you would want to know about this situation / lab value / change in

condition / etc.

R

Recommendation

What is the nurse's recommendation; or what does the nurse need / want from the health care provider? Are any tests needed?

Is a change in treatment needed?

Does the patient need to be seen immediately?
